

HDMI output not working in my Dell INSPIRON N5010

Posted by admin - 26 Jun 2012 08:08

Hi,

I am trying to connect my laptop to TV through an HDMI cable. It was working when i plugged it for the first time. But since i removed the cable once and plugged again it has stopped working. All my settings in TV is correct as i am able to plug my other laptop to the television. Do not know what has gone wrong and how i should fix it. Some help on this will be appreciated.

PS : The laptop is running on Win 7 Home Premium
