

my dell 5110 Nvidia GT 525M problem

Posted by admin - 30 Jun 2012 17:58

i have just bought my new laptop dell 5110 inspiron with this spec.:

i7 2.2GB

Nvidia GT525

8GB DDR3 Ram

...

i keep see dead pixels

my whole system is up to date .. my nvidia v301.42

my problem is on my second day after playing battle field 3 i tried to open it it freeze the whole laptop so i have to force shutdown from the power button

then i was playing hearts the windows game i found this dead pixels all over the game

+ i was playing FIFA 12 it keeps freeze for 2 or 3 seconds and be normal after that ... hope someone help me .. is that a factory issue that makes me change the whole laptop or what !!!

my proof is in the attachments ...
