How do I do a clean install of Windows 7 on Dell Inspiron 7520 (a.k.a. Inspiron 15R Special Edition)

The operating system that is pre-loaded on my Dell Inspiron 7520 (a.ka. Inspiron 15R Special Edition) is Microsoft Windows 7 Home Premium. I have a retail version of Microsoft Windows 7 Ultimate and wish to do a clean install on my laptop PC.

My laptop was able to boot up from the retail disk.

After clicking "Install Now" and accepting the terms and conditions of Microsoft Windows 7 Ultimate, I checked the box "Custom (advanced" setup in which a new copy of Windows would be installed. The next screen that popped up contained the following bizzare message: No drives were found. Click Load Driver to provide a mass storage driver for installation".

Could someone tell me where and how to locate the mass storage driver?
