

Inspiron Screen is Blank

Posted by admin - 30 Jun 2012 18:16

Hi there. So i was on my laptop the other day and the screen suddenly went blank. The power wast still on, i could hear the motor/fan running, but the screen was black. So i shut it off, thinking it would be fine when i did. But it wasn't, the screen remained blank but i could still hear Windows staring and the fan running. It hasn't worked since. Suggestions on what's wrong?
