

Touch Screen XPS L702X

Posted by admin - 30 Jun 2012 18:27

Every web site I have looked on describes the XPS L702X as having a touch screen so I bought one and have just received it but there is no touch screen. Is there something I need to do to activate it? If not what should I do? Return it and ask for a refund?

Any help much appreciated,

A very disappointed lady,

Regards,

=====
