Dell inspiron 15R N1150 screen not working
Posted by admin - 12 Oct 2012 02:02

_____

Hi all,

My laptop Dell Inspiron 15R N5110, the screen is not working and when i start the laptop it gives beep sound several times.

please anyone tell me how to make it work, is it a major defect ?

the laptop is having some other defects like the light on caps lock key does not work and the system gets heated really fast (within 5 minutes) and hangs several time while working or just restarts itself while i am working on it.

i have bought the laptop on may 10 2012 and the warranty is valid until 19 july 2013.

Anyone please suggest how to make it work as my data is in the laptop which i don't wanna loose.

Keshav Mittal
